

People Lease's PEO software, PRO Software, offers an all-in-one solution, prioritizing cutting-edge technology, ease of use, and unrivaled security to make for an unbeatable user experience.

Our Software At-a-Glance

About PRO Software -

PRO Software is an entirely unique, all-in-one software solution, leveraging the latest technology from top to bottom and processing billions of dollars in payroll in all 50 states along with several US Territories.

With Benefits, Payroll, PTO, Time and Attendance, and Performance modules all native to the software, PRO provides innovative technology, robust security, and white-glove customer service (based out of the United States).

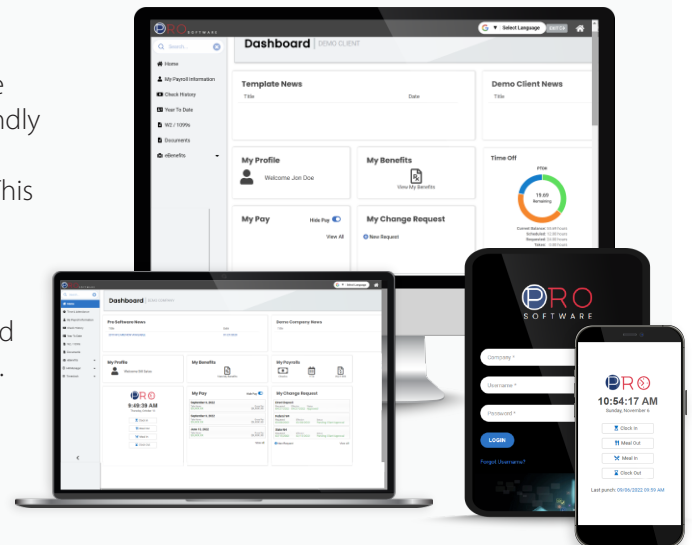

Innovative Technology & Ease of Use -

Your employees will love it. Our software wasn't only designed with the latest technology; it was designed with the end user in mind. User-friendly and easy to navigate, it is your all-in-one resource. Your employee has everything they need at their fingertips in their employee dashboard. This includes paychecks, W2s, benefit plans, and the ability to request PTO.

You will love it. Access your favorite tools, such as applicant tracking, performance management, and PTO calendars, seamlessly incorporated into the software with Single Sign-On capability and other integrations.

With PRO Software's responsive and easy-to-use design, you and your employees can access information on any device - on the go, at home, or at work.

Unrivaled Security and Reliability -

With our software, have peace of mind knowing that your data rests in a secure environment protected by encryption, strong cyphers, multi-factor authentication, and robust data replication.

- **True SaaS application born in the cloud (single database/single solution), making it easy for you to use.**
- **MSFT Azure server-less technology provides unlimited scalability & performance - get what you need to get done when you need to get it done.**
- **They are SOC Type 2 audited with strong controls and processes, ensuring that only the right people see your data.**
